11th **MILLENNIUM PHILATELIC AUCTIONS**
(Sydney, Australia)

The auctioneer's annual sale of prime philatelia, the **2006 Rarities Sale**. The sale is comprised of three sections, each presented in a separate sales catalog.

Part I - The **Guy Linfield Collection of 1839-1913 Victoria**: The collection includes material which has not been offered for several decades, and much which has never before appeared at auction. The postage stamps appear to have been specially selected for quality, with the margins of the imperforate issues reflecting same. The covers treat all aspects of postal history, with particular strength in the middle period, with Rates, Routes, Destinations, Special Services and Cancellations all being well represented; there also is a choice selection of Incoming Mail.

Part II - *Fine and Rare Stamps and Covers of the World*: 350 lots of upscale quality material, including selected items from the Large Gold-winning **Gary Brown Collection of WWI Aden Postal History**. Also offered are worldwide Proofs, Postage Stamps (including ERRORS) and Postal History, strong **Australian States**, and fine selection of **Australian Commonwealth** material.

Part III - The **Ken Barelli Collection of Classic Victoria**: The *Barelli Collection* features two important collections of **Victoria**, the International Gold Medal '**Half-Lengths**' and the National Grand Prix '**Emblems**'. The '**Half-Lengths**' incl. all of the printings with mint, used, covers and an array of retouches and other varieties, all being in the finest available condition. The collection is replete with material from the past name collections, and apparently contains the largest concentration of major pieces to appear on the market for many years. The '**Emblems**' is said to be the finest collection of these issues ever formed, and includes virtually everything noted as being of importance. The '**Emblems**' are especially noteworthy for the large number of very rare varieties of rouletting, perforation and paper. The Essays, Proofs and Multiples likewise are equally impressive.
